ERA NURSERIES - CASUAL WATER CARTAGE RATES

(1st January 2007. and Revised 1st November 2008)

Capacity

1. Prime mover with Stainless steel tanker with **21,000** litres capacity

Smaller loads are available (min 10,000 litres) but the same km charge plus proportional water, loading and unloading charges will apply.

Authorised Fill Points for Wannon Water approved disinfected drinking water are at Peshurst, Coleraine and Casterton.

CHARGES

Km Charge

\$2.00 per km from our base in Hamilton to the fill point and then to the unload destination and then the return to Hamilton. Where multiple customers are receiving water from the same fill-point, the km charge component from Hamilton to the fill-point will be shared *pro rata* by the customers receiving deliveries on that particular day.

Water Charge

Water tanker fills are metered by Wannon Water hydrant meters and charged to ERA

Loading and Unloading Charges including Water Costs

\$9.00/1,000 litres. This covers travel time for the driver plus time related costs for the filling at the fill-point and unloading of the tanker at the customer destination. This rate allows for 1 hour to fill and 1 hour to unload. At this stage queuing at the various authorised fill-points has not been a major issue however it may well become a factor as the shortage of water and subsequent demand increases.

Customers are encouraged to have made preparations to receive water tanker deliveries. (i.e. tanks accessibility, readiness etc)

Time in excess of the 1 hour allowed for filling and unloading will be charged for at the rate of \$30/hour calculated in 15 minute blocks. This may become applicable where a customer needs multiple drops from the single tanker load.

Minimum Charge. A minimum charge of \$250 per delivery will apply.

GST

All the above charges are ex GST. The ATO have advised that no GST is payable on water and associated water cartage charges.

For all enquiries and orders please contact
